Congratulations to our most recent raffle winners!

**Lynn Taylor of Midland**

"Perfect timing," she said. She chose a $150 gift card to Sears to help replace her 18-year-old dishwasher that recently broke.

Taylor said she and her family members fill out their Annual Follow-Up Forms electronically, using that's the hope.

"Some things to be learned in research may not help right now, but may in the future. We wanted to join if it can help someone else try to prevent getting those issues," Taylor said.

Taylor's parents and two adult children have also enrolled in the MURDOCK Study, and the family, who are both avid walkers and logs up to three miles a day with a friend throughout downtown Kannapolis.

As her prize, Betty chose a $150 gift card to Olive Garden, a restaurant she enjoys with her husband, David Goodwin. Betty also loves to sing at Mt. Mitchell United Methodist Church in Kannapolis, after retirement, she cared for her ailing father until he recently passed away.

She's not only dedicated to developing the MURDOCK Study into a precedent for precision medicine, she is well-respected by her peers inside and outside of Duke as evidenced by her recent notable award," Christian said.

Kristin Newby, MD

Newby's new role comes on the heels of her induction in January into the Association of University Outcomes Research Institute (PCORI). The funding for this study, “Measuring and Talking to Patients about the Accuracy of Data Used in Patient-Centered Outcomes Research (PCOR)," comes from the Patient-Centered Outcomes Research Institute (PCORI). The study will compare self-reported data and electronic health record data to identify discrepancies. Researchers will interview patients to identify the cause of the discrepancy and determine which data source is accurate. This work has been approved pending completion of a business and programmatic review by PCORI staff and issuance of a formal award contract.

**Betty Goodwin of Kannapolis**

She chose a $50 Target gift card. "I talk to my friends about the MURDOCK Study and encourage them to join," she said.

She shared the prize with her mom.

**Dr. Leigh Davy**

Davy referred her mother, Sharon Davy of Harrisburg, to the study, and won a $50 Target gift card.

Dr. Leigh Davy referred the Birina-friend Raffle for the fourth quarter of 2014. Davy joined the MURDOCK Study two years ago. After working as a child psychiatrist in Florida, she said she wanted to participate in Duke’s project as a way to contribute to efforts to find new treatments and possibly cure for disease. She is taking time off from her medical practice to raise a family. Davy referred her mother, Sharon Davy, in Baltimore, to the study, and won a $50 Target gift card.

She loves being with her husband and Mikey Nunes.

Signing day for Team MURDOCK's Sam Densen

"It's commonplace, for example, to ask patients to self-report on medication use during office visits and use that data to set up electronic health record. Zozus believes that patients can improve the quality of research and other healthcare data in a similar way.

The fund for this study, “Measuring and Talking to Patients about the Accuracy of Data Used in Patient-Centered Outcomes Research (PCOR),” comes from the Patient-Centered Outcomes Research Institute (PCORI). Duke University cardiologist named principal investigator

University’s MURDOCK Study team will manage a number of initiatives, including a focus on informatics, and maximizing data quality and efficiency and scalable infrastructure, including a focus on informatics, and maximizing data quality and efficiency. We welcome three new members to the MURDOCK Study’s clinical and data management teams! Kimberly Ellis, clinical data specialist

Duke University is expanding at the North Carolina Research Campus (NCRC). Located near the Duke Forest at Cooleemee Village, the clinical and recruitment teams will move into the NCRC Medical Plaza this summer. Duke has leased 5,000 square feet of office space with plans to expand. Carolinas Healthcare System is the anchor tenant in the 50,000-square-foot office complex.

The expansion will better accommodate Duke’s growing staff and research portfolio. "We are excited to expand our presence in Kannapolis and move our clinical operations into the Medical Plaza, which will give us room to grow and continue to deliver world-class care to our patients," said Dan Hulse, Chief Executive Officer of Carolina Orthopedics Kannapolis. Carolinas Healthcare System is the anchor tenant in the 50,000-square-foot office complex.
